

Evil Billionaires

Pandemic! Conspiracy! Martians?

The great recession, COVID-19, housing and now Donald Trump. What is going on?

Empire is Falling

For a brief moment after World War II, a few “normals” in the imperial core could make it. These privileges came at the expense of billions.

We were the house slaves of Statesian empire, and the periphery nations were the field slaves. All systems built on oppression fall apart. The system decays, and the oppressed rebel.

Civil rights, Vietnam, Afghanistan, Gaza. On so many fronts, the empire lost and is losing.

They Won't Save Us

Do we house slaves join the field slaves in their struggle, or do we fall with our masters? The fascists have chosen their side, have you chosen yours?

It's time to stop voting NDP, and it's time to start organizing outside the capitalist state. We need real change, and the servants of empire won't give us that.

Workers Unite

We workers must solve the issues the capitalists and their servants can't. The fascists are coming, and there is no time left to dawdle. Organize a tenants union. Agitate.
